Golden	17	63-66	Acrylic.
Tropi	08	67-68	Acrylic.

Whatever way you like its

Machine-made woven carpets are in great demand and offer numerous advantages: On the one hand, they are manufactured much faster than hand-woven products, making them cheaper to produce and also allow us for the swift implementation of the latest trends. The latest fashion trends are currently inspiring us more than ever.

In this collection, the carpet is literally reinvented over and over again - whether in a classic or modern design. Contemporary woven carpets are often masters of illusion they look hand-made, but are actually made on machines.

The APCO range includes large-area carpets as well as bridges, patterns, runners, bathroom sets, bed surrounds and step carpets.

Have it your way!

Textile fabrics are the all-rounders among carpets. Thanks to the constant refinement of manufacturing processes, even individual wishes in terms of size, color and materials can be accommodated. Machine-made woven carpets impress with their complex patterns and fascinating play of colors, employing natural materials like wool and cotton as well as synthetic fibers and exciting combinations of both.

Machine Made
